REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-9 are allowable over the prior art of record because the prior art of record does not teach irradiating and scanning a probe tip on a microcantilever while the microcantilever is in a tilted state to obtain a SIM image of the probe tip, and deciding a central position of the probe tip based on the SIM image prior to channel processing the probe tip.

Claims 10-20 are allowable over the prior art of record because the prior art of record does not teach providing a cantilever having a surface on which is formed a probe that projects outwardly from the surface at one end of the cantilever; irradiating and scanning a tip of the probe with a focused particle beam while the cantilever is in a tilted state so that the irradiating direction of the focused particle beam is inclined relative to the surface of the cantilever to obtain an image of the probe tip; determining the center of the probe tip from the image of the probe tip; and forming a first channel in the probe tip at the center thereof by irradiating and scanning the center of the probe tip with a focused particle beam to form a split probe tip having two spaced-apart probe tip parts.

The closest prior art of record to Chand (US PGPUB 2002/0125427) fail to teach tilting the microcantilever, scanning the probe tip of the tilted microcantilever with a focused ion beam to obtain a SIM image of the probe tip and deciding a central position of the probe tip from the obtained SIM image.

Hong et al. (KR 2001-065673) and Ishitani et al. (JP 11-219680) do not teach obtaining a SIM image of a probe tip with the cantilever tilted and deciding a central position of the probe tip from the obtained SIM image to process the central position of the probe tip.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney G. McDonald whose telephone number is 571-272-1340. The examiner can normally be reached on M-Th with every Friday off..
